LUXAR®

Anti-reflective coated glass

Luxar® glass is the new leader in anti-reflection glass. Unlike many similar anti-reflective products which are soft coat, Luxar is a hard coat which allows for easier handling, longer shelf life and makes Luxar an excellent candidate for exterior applications that are subject to environmental stress and constant cleaning. Luxar's anti-reflective coating reduces the glare of uncoated glass from 8% to 0.5% (100% more effective than competitive soft coat products) when coated on both surfaces.

Luxar is available in thickness' ranging from .08" - 1/2" (2 - 12 mm) and a maximum sheet size of 75" x 110 (280 x 190 cm). McGrory Glass stocks 6mm, 10mm and 12mm for immediate availability.

Because McGrory Glass is a stocking distributor and fabricator of Luxar, you no longer have to wait 8-10 weeks for delivery for your anti-reflection glass. McGrory is able to supply Luxar with quick lead times and a price that won't break your budget.

Applications for Luxar include:

- ⇒ Store fronts and display booths
- ⇒ Stadium suites/skyboxes
- ⇒ Traffic control towers
- ⇒ Museums
- ⇒ Aquariums
- ⇒ Zoos
- ⇒ Skylights
- ⇒ Hospitals
- ⇒ Information displays
- ⇒ Transportation
- ⇒ Cinematic projection booths
- ⇒ 99.5% UV Protection (Laminated Luxar)

Luxar can be laminated, tempered or insulated to meet the design requirements of the many industries that it serves. Please contact McGrory Glass for *handling* and *cleaning instructions*.
